**GREEN CAMPUS POLICY**

## **GREEN CAMPUS POLICY**

A green campus is a place where nature is protected by eco-friendly practices and education is combined to promote sustainable development and increase socio-economic needs of mankind.

Green Campus Committee is formulated in the College with the Principal of the college as the chairperson, and the following members – Coordinator of SATAT Committee, Members of SATAT Committee, Student Representatives.

- The Committee plans to take steps for smooth implementation of eco-friendly practices.
- Implementation of 4 “R” s like Reverse, Reduce Recycle and Re-pair are the main goals.
- The administration of the institute believes that everyone has to work towards successful implementation of green practices.
- Every individual of RBVR Reddy Women’s College will support the Green Campus Policy of the Institution.

## **Plans: -**

Green Campus Committee will plan and execute the following -

1. Conduct campus environmental impact programmes to identify the targets for improvements.
2. Establish awareness campaigns.
3. Identify the targets for improvements.
4. Plan for healthier, safer, cleaner environmental place to work.
5. Conduct Annual green programmes
6. Evaluate daily operations in terms of pollution prevention, waste management and 4'R's wherever possible.
7. Introduce Kitchen gardens in hostel, to be taken care by the students.
8. Bonsai Plants Ornamental plants, interior plants, Insectivorous plants are propagated through cutting, grafting, layering, etc to improve student's exposure. Every Student/Group of students would be made responsible for certain area to take care of plantations
9. Planning to implement terrace gardening, poly house, Glass house, introduce exotic species of plants etc.
10. Construct water rain harvesting pits to store and reuse rain water
11. Cleanliness in campus and waste management by introducing organic manual pits by using the biodegradable waste produced in college campus
12. Minimize usage of paper.

13. Introduction of medicinal plant species, to know their medicinal uses in our daily life.
14. Avoid usage of plastic bags and plastic bottles in college campus
15. Protection of old trees is done by cutting of the dried parts protection, watering and manuring them time to time.
